# Innovations that Transform Digital Nuclear Medicine

VERITON-CT digital SPECT/CT combines the best-in-class CZT detectors, 360° novel system design, high resolution CT, and advanced software technology to ensure optimization of every step.

Discover a paradigm shift in workflow and diagnostic capabilities, with:

- One platform, one location for clinical care decision-making
- 3D Total Body SPECT/CT image acquisition
- Choice of 16/64 slice

**VERITON® Series**  
360° CZT DIGITAL SPECT/CT IMAGING

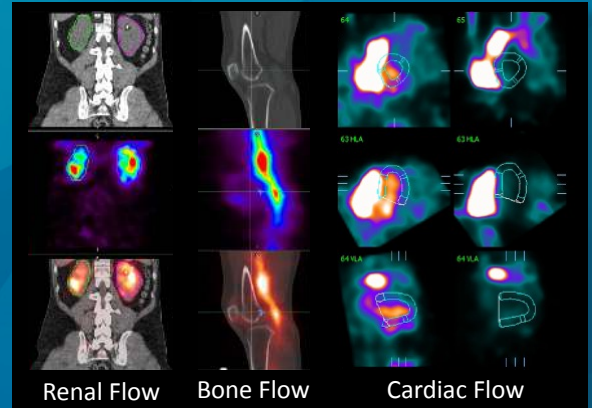

## Deep Learning Attenuation Correction

Spectrum Dynamics introduces a breakthrough in SPECT myocardial perfusion imaging for its D-SPECT digital cardiac camera.

**D-SPECT® SERIES**  
CARDIAC DIGITAL SPECT IMAGING

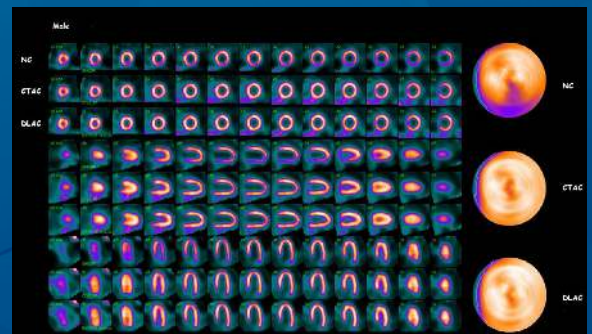

## TruFlow

### TruFlow Dynamic Imaging

VERITON-CT offers real-time 4D imaging to capture the radiopharmaceutical distribution, uptake, or clearance over time in 3D SPECT/CT parametric imaging.

## TruCorr

Using TruCorr to generate attenuation corrected images, D-SPECT now provides:

- Improved image quality: A confident interpretation with every scan
- Reduced appointment and imaging times: Potential for stress-only scanning
- Reduced radiation: No additional radiation dose incurred by patient
